

Oswego, New York

Producing more than a billion pounds of high-quality aluminum sheet each year, Oswego represents Novelis' first U.S. operation and stands today as the company's largest, wholly-owned fabrication facility in North America.

Equipped for aluminum scrap remelting, ingot casting and hot and cold rolling, Oswego generates premium aluminum products used primarily by the beverage can, building and construction and automotive markets, and in multiple industrial product applications.

Oswego continuously strives to improve its manufacturing and quality processes.

COMMUNITY INVOLVEMENT

Novelis Oswego partners with local schools to help them organize can drives. The plant matches drive donations for items like computers, educational bus trips, library books or funds for other school programs.

Through a long-term partnership, the Oswego Speedway donates its cans from every race to Novelis which in turn goes to the Cans for the Community committee. Over \$6,000 was raised last year and all speedway visitors were exposed to recycling messages each week.

Oswego employees participate on a number of regional boards including the United Way of Oswego County, the Central New York Metropolitan Development Association, Operation Oswego County, the Workforce Development Board of Oswego County, the Oswego County Chamber of Commerce, the Oswego City Zoning Board and the Oswego Port Authority.
