

## Raiders sending five to NYS track qualifier meet

By Jimmy Martin

Over the past week, all the track and field teams from Section 3 competed in their class championships. The Lady Raiders hosted the Section III Class A1/A2 Championships on Tuesday, while the boys had theirs on Friday in Camden.

The Lady Raiders tied for fourth place in the A1 division with a total of 49 points, coming from many different athletes. Leading off them was the 4x800 meter relay team of Marisa LiVoti, Erin Nicholson, Meredith Grimshaw, and Karli Bricker, who finished in fourth place.

Next were the 100 meter hurdles where Amber Desteve finished in second place with a time of 17.58. Because she finished in second, Desteve will be competing in the Section III State Qualifier Meet on Thursday at Cicero-North Syracuse High School. In the 4x100 meter relay, the Lady

Raiders managed to get sixth place and score. The team was composed of Desteve, Liz DeSantis, Erica Pawlewicz, and Kendyl Lutz.

In the 400 meter dash, Kara Bricker also took sixth place with a time of 1:05.35 and in the 400 hurdles, Desteve again took second place and moved on. Pawlewicz ran the 200 meter dash and took fourth for the Lady Raiders with a time of 28.2. The 4x400 meter relay team of Bricker, Bricker, Miwa Burdick, and Laura Hamden took sixth place. To round out the track events was Callie Beckwith the 2000 meter steeplechase for the first time and took fourth place with a time of 8:31.17

In the long jump, Erica Pawlewicz and Makenzi Loomis took third and fourth, respectively. They were right with each other as Loomis jumped 15 feet 8 inches, while Pawlewicz jumped 15 feet and 9.5 inches. Then in the triple jump, Loomis jumped 33

feet and 7 ½ inches to take third, while Beckwith jumped 32 feet and 7 ½ inches to get fifth place.

Then on Friday, the Raider boys had their class championships. With a similar score and place to the Lady Raiders, they took sixth place and scored 48 points. With the first two events being empty for the Raiders, the 110 meter hurdles came and the Raiders finally scored. Connor Aldasch ran 17.28 and finished in fourth place. In the 1600 meter run, three Raider runners all finished right in a row with Jacob Belcher (7th, 4:59.01), Kenny Deloff (8th, 5:01.19), and Geoff Michaels (9th, 5:02.13). In the 400 meter dash, it was a similar result with Scott Littleton (7th, 54.04), Mike Holcomb (9th, 55.38), and Ian Devendorf (10th, 55.70).

In the 3000 meter steeplechase Bailey Lutz finished in first, which moves him on to the state qualifier meet. He ran a time of 10:38.96 and is now the school record holder. In the 400 meter hurdles, Connor Aldasch ran a 1:01.36 and finished in third place. In the 800 meter, Jimmy Martin finished in third with a 2:03.3 but hit the state qualifier time and will also run on Thursday.

Scott Littleton ran the 200 meter dash in a time of 24.55 and took eighth. Also taking eighth was Dan Phillips in the 3200 meter run in 10:48.86. Finishing off the track events was the 4x400 meter relay as the team of Lutz, Devendorf, Aldasch, and Martin took fourth with a time of 3:41.11

In the field events, The Raiders also had success. In the shot put, Nick Reitz threw 45 feet and 5 ½ inches and took second place to continue his season. Also taking second was Holcomb in the triple jump with a jump of 41 feet and 7 inches. In the pole vault Garet Roik jumped 10 feet and 6 inches to finish in seventh.

With the exception of Desteve for the girls and Lutz, Martin, Holcomb, and Reitz for the boys, the Lady Raiders and Raiders season is over. Both teams finished with even records and placed well in the league and sectionals meets.

### What's happening at G. Ray Bodley High School?

**Attention sophomores; Youth Advisory Council (YAC) applications are due by May 30 in the guidance office. Freshman Leadership Oswego County Youth (LOCY) applications are due by May 30 to the guidance office. If you want more information or need an application, see Miss Stubbmann in the guidance office.**

There will be an informational meeting for **Battle of the Books** today in the LMC during guided study hall.

Summer job information is available through the guidance office for students 16-20 years old who meet eligibility guidelines. Pick up a Summer Youth Works informational flyer today.

Seniors: **dinner dance contracts** must be completed at time of ticket purchase, which ends on Thursday, June 5.

**French Club** meets every Tuesday after school in room 125.

Sign-ups for any girls interested in playing soccer in the fall will be held today after school in room 203.

**Future Business Leaders of America** meets every Monday in room 116.

**HOPE Club** will hold its final meeting of the school year on Monday, June 2 from 2:30 to 3 pm to celebrate this year's accomplishments. The meeting is open to current members as well as those thinking of joining next year.

There will be a meeting for all girls interested in summer basketball after school on Thursday in room 204.

### What's for lunch?

**Today:** Cheese pizza with side salad, baby carrots and fresh apple with alternative of egg, ham and cheese taco to go.

**Thurs. May 29:** Roasted turkey and gravy with biscuit and mashed potatoes, spinach and mixed fruit cup with alternative of yogurt, cheese stick and jungle crackers.

# Coming soon to a restaurant near you: robots!

As workers across the country call for the fast-food chains to raise their wages, a number of major companies have begun experimenting with new technology that has the potential to significantly reduce the number of restaurant workers in the years to come. Restaurant industry experts warn that a sharp rise in wages would be counterproductive, increasing the appeal of automation and putting more and more workers at risk of job loss.

“Faced with a \$15 wage mandate, restaurants have to reduce the cost of service,” announced an ad in The Wall Street Journal last year from the Employment Policies Institute, which supports corporate interests. “That means fewer entry-level jobs and more automated alternatives — even in the kitchen.”

Other industry observers aren’t so sure, noting that it takes time to introduce new technology and that human interaction has always

**“The news follows moves from Chili’s and Applebee’s to place tablets on their tables, allowing diners to order and pay without interacting with human wait staff at all.”**

been a major component in hospitality. What’s clear at least is that software and machines will play an increased role in our dining experiences going forward. Panera Bread is the latest chain to introduce automated service, announcing last month that it plans to bring self-service ordering kiosks as well as a mobile ordering option to all its locations within the next three years.

The news follows moves from Chili’s and Applebee’s to place tablets on their tables, allowing diners to order and pay without interacting with human wait staff at all. Panera, which spent \$42 million developing its new system, claims it isn’t planning any job cuts as a result of the technology, but some analysts see this kind of shift as inevitable for the industry. In a widely cited paper released last year, University of Oxford researchers estimated that there is a 92% chance that fast-food preparation and serving will be automated in the coming decades. With artificial-intelligence technol-

ogy like IBM’s Watson platform making strides in advanced reasoning and language understanding, it’s not hard to see how robots could be designed to provide more sophisticated interactions with restaurant customers than kiosks can manage.

Delivery drivers could be replaced by self-driving cars, which are likely to hit the market within a decade or two, or even drones. In food preparation, there are start-ups offering robots for bartending and gourmet hamburger preparation. A food processing company in Spain now uses robots to inspect heads of lettuce on a conveyor belt, throwing out those that don’t meet company standards, the Oxford researchers report.

Darren Tristano, a food industry expert with the research firm Technomic, said digital technology will “slowly, over time, create efficiency and labor savings” for restaurants. He guessed that work forces would only drop as a result by 5% or 10% at a maximum in the decades to come, however, given the expectations that customers have for the dining experience. “If you look at the thousands of years that consumers have been served alcohol and food by people, it’s hard to imagine that things will change that quickly,” he said.

## Heat keep rolling behind James

Lebron James and the Miami Heat are proving to be too tough of a matchup yet again in the playoffs. With Monday night’s 102-90 win the Heat are up three games to one on the Indiana Pacers, and they play again tonight in Indiana as the Pacers look to avoid elimination. Lebron James made history Monday night when he broke the record for the most playoff games with 30-plus points, 10-plus rebounds and 5-plus assists.

Lebron had 32 points in Monday’s win that may have been credited to Lance Stevenson’s trash talking. Stevenson said Lebron was showing signs of weakness, and James answered and brought his team to victory. The Heat have made it through the 2014 playoffs with little trouble, sweeping the Charlotte Bobcats in the first round, then continuing their hot streak by beating the Brooklyn Nets four games to one, and they now look to finish off the Pacers in Indiana and take the series four games to one to advance to the NBA finals for four years in a row. The Heat are looking to win their third NBA championship in a row, and behind the big three of James, Bosh, and Wade the Heat are a favorite to win it all. *By Jason Mattice*

### The Sweet Side of Life

## Peanut-butter pie is well worth a try

This superb dessert with a chocolate crumb crust and a creamy peanut butter filling can be garnished with cut up chocolate or chocolate chip cookie bits. In order to get the best taste out of this pie,

serve room temperature.

#### Ingredients

- 1 1/4 cups chocolate cookie crumbs
- 1/4 cup white sugar
- 1/4 cup butter
- 1 (8 ounce) package cream cheese, softened
- 1 cup heavy whipping cream
- 1 teaspoon vanilla extract
- 1 cup creamy peanut butter
- 1 tablespoon unsalted butter, softened

#### Directions

1. Preheat oven to 375 degrees F (190 degrees C).
  2. Combine 1 1/4 cup cookie crumbs, 1/4 cup sugar, and 1/4 cup butter; press into a 9-inch pie plate. Bake in preheated oven for 10 minutes. Cool on wire rack.
  3. In a mixing bowl, beat cream cheese, peanut butter, 1 cup sugar, 1 tablespoon butter, and vanilla until smooth. Whip the cream, and fold into the peanut butter mixture.
  4. Gently spoon filling into crust. Garnish pie with chocolate or cookie crumbs if desired. Refrigerate for several hours before serving.

### Musician of the Week: Senior Sarah Halstead

The Musician of the week this week is senior Sarah Halstead. Sarah is an 18 year old violinist who is currently participating in the G. Ray Bodley High School Symphonic Orchestra as the Concert Mistress and leader of the orchestra for the Senior Night Concert on Thursday, June 12, at 7:30 pm.

In her spare time, Sarah plays soccer, and was one of the captains of the girls' varsity team at GRB. When asked what she liked most about being a Violinist, Sarah simply stated that she likes to play the melody, and loves the challenge. She also says, "I love the fact that no matter how much I practice, there's always more to work on."

This year, Sarah was second chair second violin for NYSSMA (New York State School Music Association) Majors for which the Symphonic Orchestra won Silver. They played three pieces; Brandenburg Concerto No. 3, Adagio for Strings, and Intermezzo, which the judges seem to have enjoyed. Sarah's favorite piece of the three was Brandenburg Concerto No. 3 because "there's a lot of energy in the piece and it's really fun to play because it is a higher level piece, which makes me work harder."

Sarah's favorite thing about being in the Symphonic Orchestra is the people who are involved. She states, "I'm not the best musician, but the fact that I get to play in this Orchestra with the people involved, makes me strive to work harder and become a better musician."

# The Fugitives part 18: the battle rages on!

By Neal Burke

*When we last left our Fugitives they were battling through the junk facility on Ugwadule B, Lupo and Silver going to hold off resistance while Ordin and Crystal went to destroy the boilers. Lupo and Silver met up with two of Bala's Project Legion subjects and Lupo was swallowed alive by one of them, causing Opul to be released. After dealing with the workers in the boiler room, Crystal and Ordin also met up with a Project Legion subject. Will they all succeed in the mission or are they doomed to fail? Find out now.*

The winged monster growled as it leapt for Ordin and Crystal, claws ready to strike. Thinking quickly, Ordin pushed Crystal out of the way and slammed his fist into the monster's face. The thing flew across the room and crashed into one of the boilers which erupted in flames. However, the explosion wasn't big enough to cause a chain reaction. Much to Ordin's surprise, the creature emerged from the flames unharmed. Before he could react, the thing flew toward him and slashed at his chest with its burning claws. He cried out in pain as he fell to the floor, now with three smoking wounds in his chest.

Shaking her head when she was pushed aside, Crystal immediately ran to her boyfriend's side when he was slashed. Pulling out her AC-73, she fired a few blasts at the creature which served to send it flying off to hide.

"Are you alright?" she then asked Ordin as he sat up and placed a hand to his chest. He wheezed a little before replying.

"Yeah, it's not too bad."

Just then, the creature attacked again and Crystal bravely leapt at it, her claw extenders ready.

Back out on the tech platform, Opul and Silver were still just standing there when suddenly the hooded warrior recovered from being knocked out and before Opul could utter a warning, he slashed him across the back. Silver cried out in pain and fell to his knees. Opul tried to go to him but was stopped when two more Junk Arachnoids blocked her path. One with large metal pincers for hands and the other with a blade for its right arm and a damaged blaster rifle for the other.

"Out of my way, fools!" Opul growled in annoyance and anger as she drew her Whip Blade and attacked them.

Silver gritted his teeth and hissed at the searing pain in his back as the hooded warrior circled him, his bloody red blades humming loudly. He looked in front of him and saw Opul fighting against more Junk Arachnoids but it seemed for everyone she killed, two more came in to take its place. His vision was then blocked by the hooded warrior who was standing over him. He then held the tip of one of his blades dangerously close to Silver's throat.

"Any last words?" The hooded warrior asked, before letting out a raspy laugh. It was a cold laugh, devoid of humor and full of mockery.

"Let me help." Silver heard his other self, Nightclaw, tell him. He knew that letting him loose might get ugly, but would definitely

prove useful against this warrior. So letting out a low growl, Silver let Nightclaw take over.

Teeth enlarged into fangs and fingernails grew into claws as his face became the snout of a wolf. Before the hooded warrior could do anything, Nightclaw used his broadsword to push the glowing blade away and in another swift move, slashed at his chest.

The hooded warrior backed away some before uttering a guttural growl. Charging in again, he parried Nightclaw's next attack and knocked the broadsword out of his hands, sending it falling to the bottom of the facility. Nightclaw growled with anger before tackling the hooded warrior off the platform and the both fell down several meters. Landing on a conveyor belt, they both got to their feet quickly and Nightclaw growled. The hooded warrior laughed again before throwing one of his blades to him.

"I want a good challenge so be thankful that I'm not killing you right here."

"I'll be happy to give you a good challenge." Nightclaw replied with a sneer, gratefully taking the blade and adopting a fighting stance.

After finishing off the last of the Junk Arachnoids, Opul's eyes widened when she saw both Nightclaw and his opponent fall off the platform. She frantically ran to the edge to see if she could find

**The hooded warrior backed away some before uttering a guttural growl. Charging in again, he parried Nightclaw's next attack and knocked the broadsword out of his hands, sending it falling to the bottom of the facility.**

him and was relieved to see that they had landed on a conveyor belt a not too far down. Taking a deep breath to ready herself, she jumped down to help him.

Back in the boiler room, Crystal had just been slashed across the chest and was fortunate to land in Ordin's arms. She had managed to slash the creature several times with her claw extenders, but the creature seemed to possess a healing factor of sorts and had all but healed from her assault.

"We need to rethink our plan." he told her, setting her down gently.

"I agree." Crystal replied with a nod. Her mind raced, trying to think of a way that they could destroy the boilers while killing the winged monster that was now facing them. Before she could come up with anything, the creature swooped in again.

Crystal and Ordin just barely managed to get out of the way and Ordin's eyes drifted back to the computer. Seeing it gave him an idea.

"Crystal, get to the computer," he told her. "Fenris and I will dis-

# The Fugitives part 18: the battle rages on!

(from page 4)

tract it and when we get him down, you set the boilers to overload. Then we'll seal him in here."

Crystal nodded and ran to the computer as Ordin let Fenris take over. Once there, she activated her communicator to contact Lupo. If she and Ordin had met up with one of these monsters, she wanted to be sure her baby sister and Silver were safe. After some brief static, Crystal was surprised when Opol answered instead of Lupo.

"Opul here," she said. Crystal could hear the sounds of Junk Arachnoids in the background. "What is it?"

"What happened to Lupo?" Crystal then asked, wondering why Lupo let her take over. After a grunt of effort and a few more Junk Arachnoid shrieks, she heard Opol reply.

"We'll discuss that later. Right now things are a little rough. Opol out." Then the line went dead.

Crystal gasped, now very worried about Lupo. However, she knew that Opol was more than capable of defending herself and that lessened the worry a little. So she turned her attention back to the battle between Fenris and the winged beast and waited for his signal to set the boilers to overload.

Fenris ducked under another swipe of the creature's claws before punching it in the chest with enough force to shatter a normal creature's rib cage. But the creature barely flinched and lashed out with a powerful kick to Fenris' chest. While managing to stay upright, he skidded a few feet across the floor before being able to reassess the situation.

The creature was flying for him again before he could put too much thought into it but was able to block the attack with his arm, though he suffered another slash from it. Growling with anger, Fenris pivoted his left foot and lashed his right leg out in a hard round-house kick to the creature's face. Before it could react, he wrapped his arm around its neck in a headlock and brutally began slamming his fist into its chest to hopefully get some blood flowing or some bones cracking. But nothing happened and the creature reached up and dug its claws into Fenris' shoulders.

The pain forced him to release the creature and it attacked again by using amazing strength to flip him over its shoulders and onto his back. Before he could do anything, the creature was on top of him and punching him in the face repeatedly, just as he had done to its chest a few moments before. Unwilling to let her boyfriend get beat up like that, Crystal let her other self, Bloodstone, take over and she charged into the fray, viciously tackling the monster off of him and wrestling with it along the floor. Shaking his head and wiping the blood from his face, Fenris sat up and looked in the direction of the commotion. Standing up, he headed in that direction to help Bloodstone but she told him no.

"Set the boilers to overload!" she exclaimed before being pinned by the winged beast.

He knew he had to do that but he was unwilling to leave the one he loved. Fenris then leapt into the air and landed in front of them. Pulling the monster from his girlfriend, he held it tight and kneed it several times in the back, hoping to break its spine, but the creature still seemed unaffected. Angered at this, Fenris threw the beast aside and pulled Bloodstone to her feet. Before she could say anything,

the creature growled again. Turing in its direction, they saw it just standing there, heaving as though it were tired. This gave Fenris an idea and pulling the AC-37 out once again, he fired a single shot at the creature's shoulder. When it hit, the creature actually snarled in pain and both Fenris and Bloodstone could see a smoking wound on its shoulder. Grinning, Fenris told Bloodstone to get ready to set the boilers to overload while he dealt with the creature.

Back on the conveyor belts, the battle with the hooded warrior was still progressing. Nightclaw was forced to fight him alone as Opol was still being forced to deal with more Junk Arachnoids. Sparks flew as blades clashed again and again. Missed strikes took out giant crushers, welders and other tools in showers of sparks. All off the combatants jumped and danced around to avoid all these dangers plus the extremely hot metal at their feet.

Nightclaw ducked under a swipe from the hooded warrior before thrusting his blade forward. The attack found its mark, but only partially, leaving a smoking burn in the warrior's armor. He growled in anger before swinging his blade in a wide arc again, hoping to decapitate his foe but Nightclaw once again ducked under it and retaliated by swinging his blade in a wide arc though a little lower. This attack was a bit more successful than the previous one and actually left a red slash across the hooded warrior's chest. He must have hit some flesh because the hooded warrior actually let out a grunt of pain.

This made Nightclaw grin and he attacked again and again, forcing the hooded warrior on the defensive. He growled with frustration as he blocked each blow, now unable to find an opening to attack. Before the hooded warrior could stop him, Nightclaw kicked the blade out of his hand and caught it. Now armed with two blood red blades, Nightclaw spun them and sliced off the hooded warrior's arms at the elbows. Just as he was stumbling back, Nightclaw kicked him across the face, sending him off the conveyor belt and screaming to his death. Giving a slight chuckle, Nightclaw deactivated the blades and looked the hilts over.

"I think I'll keep them," he said before putting them in his robes.

"I really hate these things!" Opol growled angrily as she finished off the last Junk Arachnoid by decapitation.

Turning around, she saw that Nightclaw had defeated the hooded warrior and was now turning to face her. He gave her a smile before letting out a sigh and collapsing as he transformed back into Silver. Opol let out a slight gasp and ran to him, catching him before he fell onto the hot metal below them and cradled him in her arms. With amazing grace, she leapt up onto another conveyor belt and then another before reaching a new tech platform. Setting him down, she saw his blood on her hands, no doubt from the slash he had received earlier. She knew he'd be fine, she was worried more out of instinct. She decided she'd better check in with Crystal but first, better check on Lupo to make sure she was okay. Reaching deep inside her mind, she tried to find her frightened other self.

*Our Fugitives are very close to completing their mission, but will they manage to get out of the facility alive? And what about Bala? What will her reaction be to what they have done to both the facility and her soldiers? Find out next time on The Fugitives.*
